DETAILED ACTION

Response to Amendment

The Declaration filed on December 14, 2005 under 37 CFR 1.131 is sufficient to overcome the Berkey et al. (6,883,351) reference. The declaration confirms with the requirements of 37 CFR 1.131 and shows reduction to practice of the invention of claim 1 prior to the filing date of Berkey et al.

Allowable Subject Matter

Claims 1-4 are allowed. The following is an examiner's statement of reasons for allowance. Independent Claim 1 is allowed because the prior art of record fails to teach or fairly suggest an article, or means for, a multimode optical fiber having; a radially varying refractive index, and a core diameter greater than 30 microns with a twist impressed on the core, the twist being at least one per meter of optical fiber; in combination with the other recited limitations in the claim. Claims 2-4 are allowable due to their dependence on claim 1.

Regarding the recited limitation of "a twist impressed the core" in claim 1. This recitation, when read in light of the specification by one of ordinary skill in the art at the time of the invention, clearly indicates a permanent or "frozen-in" (See e.g. paragraph 26 of the PG Pub.) twist rather than functional language. (See e.g. paragraphs 25-26 of the PG Pub.).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Asawa et al. (6,487,338) teaches a multimode fiber.
